Print & Copy Control

Take control of document production.

Ricoh Print and Copy Control (PCC) is a cost-effective, hardware-free system that helps you simultaneously control MFP access, manage account codes, track use, increase user mobility and minimize waste. It's a perfect upgrade for your Equitrac Office™ or Equitrac Express™ system.

Secure authentication options.

Protect sensitive data and prevent unauthorized use with the authentication method that fits your business.

- Ultimate simplicity and security. Employees access MFPs using their company ID badges and optional card readers that install in minutes. Ricoh PCC accepts MIFARE®, Legic®, HID® Prox (125 KHz) and magnetic stripe cards.
- Convenient customized access. Easily track all document output using secure PIN access—by user, project or even workgroup.
- Instant company-wide access. Users simply input their existing network IDs and passwords to “unlock” MFPs.

Easy installation and launch.

Ricoh PCC provides centralized, server-based licensing that's free from external terminals. Just configure network settings and each MFP is dynamically licensed and auto-discovered by the server.

- Quick installation. Installation and usage tracking is especially easy, since software is directly embedded on the hard drive of select Ricoh MFPs.
- Simplified IT updates. Device configuration takes place at a centralized server console panel instead of at individual MFPs.
- Terminal-free convenience. No extra cables, no need to disassemble and reassemble MFP, no terminal configurations or malfunctions.

Detailed cost tracking and control.

Ricoh PCC tracks all off-the-glass copies and secures print jobs, and then sends the data to your Equitrac system.

- Managed cost control. Track color versus black-and-white output using separate pricing structures.
- Intelligent budgeting. Create quotas and account balances for users and projects. Users see a balance summary at login and logout.
- Straightforward accounting. Use billing codes to differentiate between billable and non-billable documents. Works with the Equitrac Client Billing Module.

User-friendly and secure.

- Convenient, secure printing. Follow-You™ document production lets you output documents from any network MFP. So you can avoid busy or unavailable machines, or send multiple documents and print them as needed in different departments, floors or buildings.
- Timed control. Administrators can schedule automatic deletion of jobs from the server after a preset time limit.
- Strengthened security. Jobs reside on a secure server—not on system hard drives. Plus, fewer documents sit unattended in output bins since they're held until released by user.

For a list of supported paper models, please consult your authorized Ricoh reseller.

CA-0588

Users can authenticate, see account balance and select jobs for printing right on the MFP's control panel.

User interface

- Integrated with Ricoh MFP operation panel
- Multi-language end user screens

User authentication

- Primary PIN code only
- Primary and secondary PIN codes
- Network user ID and password
- ID cards and Equitrac card reader (MIFARE®, LEGIC®, HID® Prox (125 KHz) and magnetic stripe cards)

Principal strengths

- Copy control and tracking
- Follow-You™ secure print tracking technology
- Client billing support
- Release key support
- User balance preview
- End of session summary (incl. costs and number of pages)

Key benefits

- Increase document security controls
- Access a wide array of authentication mechanisms
- Increase user mobility
- Avoid and reduce waste
- Reduce IT requirements
- Reduce total cost of ownership

Simplify walkup use and strengthen security with an optional card reader.
